

Purchase of
electronic
components

Finally
buying
electronics
cleverly.

Topic: Purchase of electronic components

Are you **new** to the industry **or** would you like to **improve** your **knowledge** concerning electronic components? Would you like to learn more about the particularities of the electronics market?

Purchasing electronic components requires **extensive** background and market knowledge.

Due to the **enormous cost pressure** and **competitive environment**, **well-founded knowledge** in electronics purchasing is **indispensable**.

In-House Workshop

● **Date:**
individual arrangement

● **Course Schedule:**
09:00 am to 05:00 pm

● **Cost:**
Price per workshop: **€ 2990,-** plus VAT
incl. conference documents

● **Information and Registration:**
For appointment requests and further information, please email **info@am-sys.com**.

● **Venue:**
The workshop can be held on your premises or in a conference hotel in Munich.

● **Workshop content based on Industry standards/ norms:**

Coaching of one or more people.

This one-day in-house workshop helps you and your colleagues to maintain **insight** and offers you the **best possible return on investment** through the use of alternatives, other procurement channels and ideas for optimised logistics concepts.

Electronics is characterized by high technological dynamics, market fluctuations and an **enormous** variety of functions and components. Our training modules focus on the **development** and **deepening** of the **knowledge** and the answering of concrete questions.

You receive:

- Information on **potential savings** and **arguments** for negotiating with suppliers
- **Knowledge and understanding** of components and the components market
- Overview of **legal** and **regulatory topics**, ideas for logistics and purchasing
- Opportunities to apply what you have learned **directly** in numerous **practice-oriented case studies** and **workshops**

AMSYS GmbH
ABC-Strasse 19 | 22880 Wedel - Hamburg

Contents:

Select the areas of electronics purchasing from the modules which give you added value in your everyday purchase:

Module 1: Basic knowledge of electronic components

- Getting to know and distinction between passive and active components
(No previous knowledge necessary)

Module 2: In-depth knowledge of electronic components

- Search for alternatives in passive components
- Processability of components
(Basic knowledge of electronics required)

Module 3: In-depth knowledge of semiconductors

- Rough distinction between functions of semiconductors
- Knowledge of market conditions & pricing
- Secure handling of project offers from suppliers
(Basic knowledge of electronics required)

Module 4: Basic knowledge of contract law for buyers

- Commercial basics
- Escalation for non-deliveries
- Safety in discussions with suppliers
(No previous knowledge necessary)

Module 5: Basic knowledge about PCNs

- Explanation of PCNs (changes and discontinuations)
- Distinction between PCNs
(No previous knowledge necessary)

Module 6: Basic knowledge of market observation & purchasing sources

- Source supply for market observation
- Change in the electronics market through indicators
- Designing requests: sourcing, sources, quantities, price specifications, benchmark requests
- Brokers: Obsolescence, bottlenecks, price savings and more
(No previous knowledge necessary)

Module 7: Basic knowledge of manufacturing basics

- Manufacture of electronic assemblies
- Understanding technical terms
- Basic knowledge of the development process up to the finished PCBA
(No previous knowledge necessary)

Module 8: Basic knowledge of calculation basics

- Calculation of the production of an electronic assembly
- Establish comparability
(Assuming basic knowledge of production)

Module 9: Basic knowledge purchasing at brokers

- Function of procurement with independent distributors
- Standards and guidelines to avoid counterfeit goods
(No previous knowledge necessary)

Method:

Short trainer impulses, exercises, individual and group work, Discussion and exchange of experiences, storytelling, lively practical examples

Trainer:

Graduate industrial engineer **Anke Bartel** with 30 years of professional experience in the various stages of the supply chain. Active member of the board of **COGD** e.V. for over ten years.
